

Antenna Duplicate Guide

Written By: iDeleted

INTRODUCTION

This guide will demonstrate how to replace the antenna on the Motorola V180.

In order to fix the antenna, you need a replacement antenna. You may purchase one [here](#).

Step 1 — Antenna

- Unscrew your old antenna by rotating the antenna counterclockwise and removing it from the phone.

Step 2

- After removing the antenna, the phone should appear like this.
- If it does not look like this, please repeat the previous step.

Step 3

- Insert the new antenna in the hole located at the top of the phone. This hole is where the previous antenna was removed from.
- Rotate the new antenna clockwise until it is secured in the hole.

Step 4

- The phone should now appear like this. If not, please review previous instructions.
- The installation of your new antenna is now complete.

To reassemble your device, follow these instructions in reverse order.
